

Electronic Standby Indicator Model ESI-2000

Enjoy the latest enhancement for your TBM

ESI 2000

It replaces the three traditional electro-mechanical standby instruments and combines the information into a compact and easy to read 4" x 3" display.

It will continue to provide the pilot attitude, altitude and airspeed information from its own internal battery should aircraft primary electrical power be lost.

Validity

SN 434 to 633, 636 to 644
